SKILLS & LANGUAGES

- React JS
- Next JS
- Tailwind CSS
- ASP .NET / Core
- Node JS
- Flask
- MySQL
- Firestore
- Flutter
- Bootstrap
- Python
- C++
- Java

TOOLS & SERVICES

- Android Studio
- VS Code & Visual Studio
- Firebase
- AWS
- GCP
- Postman
- SQLYog
- MySQL Workbench
- Redis
- Loggly
- Kibana
- Jira
- Git

HOBBIES

- ✧ Playing Football
- ✧ Coding & Creating Projects
- ✧ Learning New Technologies

EDUCATION

LOVELY PROFESSIONAL UNIVERSITY, PHAGWARA *(2019-2023)*

B.Tech Computer Science & Engineering (8.62 CGPA)

ARMY PUBLIC SCHOOL, HISAR *(2018-2019)*

Graduated High School in CBSE Curriculum with 89.8%

ARMY PUBLIC SCHOOL, HISAR *(2016-2017)*

Class 10th CBSE Board with 9.2 CGPA

EXPERIENCE

■ Software Engineer
Full-stack Developer

LeadSquared
May 2022 – Present

- Developed and maintained scalable and secure backend services using C# .Net, MySQL, Redis, AWS, ensuring high performance and reliability.
- Developed responsive and performant web applications using React JS, Tailwind CSS, Bootstrap, etc. optimizing frontend performance and user experience.
- Assisted in troubleshooting and debugging issues across all the modules, ensuring robust security practices and adherence to coding standards.
- Investigated and resolved complex technical issues reported by clients, achieving 98% customer satisfaction rate through prompt and effective solutions.

■ Software Engineer Intern
Full-stack Developer

Redbasil Technologies
Apr 2021 – May 2022

- Developed robust applications using Flutter as frontend, NodeJs as backend, and Firebase/GCP for scalable cloud solutions.
- Implemented secure Order, Cart, and User Management systems using Firebase security rules to insure database & cloud storage integrity.
- Utilized Pub-Sub mechanism for reliable message delivery and event handling, supporting multi-lingual Catalog Management.
- Integrated Razorpay Payment Gateway with scalable architecture, ensuring seamless operation and including Webhook support for transaction handling.

PROJECTS

■ Job Lister - Website
Laravel, Bootstrap, MySQL

Mar 2022 - Apr 2022

A platform for employers to list job openings and job seekers to search and apply, offering job management, advanced search filtering, and user authentication.
https://github.com/roshan9419/job-lister

■ ProbDiscuss - QnA Website
Angular, Bootstrap, Firebase, NodeJs, Algolia

Oct 2021

QnA platform for professionals and students, facilitating problem-solving through question posting and discussion, powered by a search system.
https://probdiscuss-qna.web.app/

■ Sortlizer - Sorting Visualizer
Flutter

May 2021 - Jun 2021

A tool for students and programmers, for visualizing sorting algorithms with step-by-step sorting, custom input, detailed info and code implementation, and many more.
https://github.com/roshan9419/Sortlizer

■ Personal Assistant - Chatbot
Python, Tkinter, OpenCV

Sept 2020 - Oct 2020

A virtual assistant with voice and text input, featuring image search, web automation, mini-games, and many more with OpenCV-based face security.
https://github.com/roshan9419/PersonalAssistantChatbot

HONORS & AWARDS

- ✧ 3rd rank at **CodeEd** Online Hackathon — Nov 2020
- ✧ 1st rank at **WebMania 3.0** (College event) — Mar 2020
- ✧ 2nd rank at **COFAS** International Computer Event — Oct 2018
